PROFESSIONAL SUMMARY

Software Engineering graduate (B.Eng., Ontario Tech) with 4+ years of professional full-stack development experience. Shipped 70+ production websites and built end-to-end projects spanning React, Next.js, TypeScript, ASP.NET Core, and modern AI APIs (Claude, fal.ai). Strong fundamentals in software architecture, REST API design, security, and CI/CD. Comfortable owning a feature from requirements through deployment.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, Java, C#, C, C++, SQL, PHP, HTML5, CSS3, Bash

Frameworks & Libraries: React, Next.js 14, Node.js, Express, ASP.NET Core 8, Entity Framework Core, Vue.js, Django, Flask, Tailwind CSS, jQuery, Bootstrap

Databases: SQL Server, PostgreSQL, MySQL, MongoDB, CosmosDB, SQLite

Cloud & DevOps: Microsoft Azure, Vercel, GitHub Actions, GitHub Pages, Docker, Kubernetes, CI/CD pipelines, Jenkins

AI & Integrations: Claude API (Anthropic), fal.ai Flux Pro, REST APIs, JWT, OAuth, Web APIs (Audio, Service Workers, localStorage)

Tools & Methodologies: Git, Visual Studio 2022, VS Code, Playwright, Postman, Swagger, Agile/Scrum, TDD, SDLC

PROFESSIONAL EXPERIENCE

Web Developer

June 2022 – Present

Muslim Association of Canada — Mississauga, ON

- Built and maintained 70+ production WordPress websites, authoring 85% of institutional sites on macnet.ca.
- Designed responsive, mobile-first interfaces using HTML5, CSS3, JavaScript, and PHP, ensuring accessibility and cross-browser compatibility.
- Integrated REST APIs across donation, ticketing, and email automation systems to streamline frontend-backend data flow.
- Customized plugin architecture (Slider Revolution, Donation, Event Tickets, Active Campaign), increasing user engagement by 25%.
- Managed MySQL databases and version-controlled all changes via Git, enabling collaborative deployments and rollback safety.
- Conducted QA testing, debugging, and performance optimization, maintaining 99%+ uptime across institutional properties.

Application Developer & Support Intern

Oct 2021 – June 2022

Muslim Association of Canada — Mississauga, ON

- Resolved 150+ technical issues and production bugs, improving site performance by 20%.
- Served as super-administrator for all MAC web properties, hardening security policies and access controls.
- Delivered new application features and automated workflows that increased operational efficiency by 15%.
- Partnered with IT teams to test and roll out new services, ensuring smooth production launches.

Web Designer & Developer

Jan 2022 – May 2022

University of Toronto — Toronto, ON

- Partnered with student researchers to develop an interactive Student Engagement Award microsite for U of T.

- Independently shipped covid19digitalreview.com — a WordPress site documenting Indigenous COVID-19 experiences with an interactive world map enabling country-level navigation.

PROJECTS

ProShot Studio — AI Professional Headshot Generator

Next.js 14 · TypeScript · Claude API · fal.ai Flux Pro · Tailwind CSS · Vercel

- Built full-stack AI web app generating 4 photorealistic professional headshots in ~30 seconds across 10+ industries.
- Architected two secure server-side Next.js API routes orchestrating Claude (prompt engineering) and fal.ai (image generation), keeping API keys isolated from the browser.
- Implemented two-phase async loading UX, dynamic error handling, and centralized design-token system for a polished single-page experience.
- Deployed via GitHub → Vercel CI/CD pipeline with environment-variable-based secret management.

SceneShield AI — Real-Time Content Filtering Platform

ASP.NET Core 8 · React 18 · Chrome Extension (Manifest V3) · Entity Framework Core · SQL Server · JWT

- Architected full-stack content moderation platform combining a REST API, React web app, and Manifest V3 Chrome extension targeting Netflix, Disney+, Prime Video, Hulu, and Max.
- Designed pluggable AI service interface (Strategy pattern) allowing detection providers (OpenAI, AWS Rekognition, custom models) to be swapped via a single dependency-injection registration.
- Built real-time scene filter engine processing video timestamps at ~4Hz with sub-100ms latency, applying mute/skip/overlay actions client-side without DRM circumvention.
- Engineered 6-entity EF Core schema with ASP.NET Identity + JWT bearer authentication and per-profile sensitivity preferences.

Dragon — Tame Your Fury — Virtual Pet Progressive Web App

Vanilla JavaScript · HTML5 · CSS3 · SVG · Web Audio API · Service Workers · localStorage

- Shipped single-file PWA with offline support and home-screen installation; deployed to GitHub Pages with zero build step.
- Hand-coded animated SVG character with 17 stackable outfits, 7 environments, and CSS-variable theming, reducing asset weight 92% (1.3 MB → 100 KB).
- Synthesized all sound effects in real time via Web Audio API oscillators, eliminating audio file dependencies and licensing concerns.
- Engineered timestamp-based decay system enabling persistent state changes while the app is closed, with versioned localStorage schema migrations.

EDUCATION

Bachelor of Engineering (B.Eng.), Software Engineering

Sept 2020 – June 2026

Ontario Tech University — Oshawa, ON

Relevant Coursework: Software Design & Architecture, Data Structures & Algorithms, Cloud Computing, Distributed Systems, Software & Computer Security, Database Management Systems, Mobile App Development, Computer Networks, Introduction to AI, Operating Systems.

LEADERSHIP & ACTIVITIES

- **Employment Peer-Coach**, Ontario Tech University Career Centre (Jun 2022 – Apr 2023) — Designed and delivered workshops on job readiness, interview technique, and professional communication.
- **Vice President, Internal Affairs**, Muslim Students' Association, Ontario Tech (2022 – 2023).
- **Director of Events**, Islamic Relief, Ontario Tech (2023 – 2024); Muslim Students' Association (2021 – 2022).
- **Assistant Instructor**, Ontario Tech Engineering Outreach (2022 – 2023) — Taught Python and Java to K-12 students through hands-on workshops.
